DAY ONE: 7th March 2006

8:30 Conference registration

9:00 Opening remarks from the Chair

Guy Lupo, National Director (Australia-New Zealand), Information Systems Security Association (ISSA); and Chairman, Identity Management Network

FEDERAL GOVERNMENT KEYNOTE PRESENTATION

9:10 **National ID security**
Hon. Philip Ruddock MP, Attorney General of Australia

INTERNATIONAL KEYNOTE PRESENTATION

9:40 **Worldwide trends and developments in ID management**

Managing identity today is far more complex than it was just a few short years ago. Establishing an effective level of control over **who** can access **what** information is essential when those accessing the information include employees, vendors, partners, government agencies and others. This session will look at:

- Legislation and regulation impacting ID Management
- Technologies and solutions for ID Management
- Cost-conscious ID Management
- Effective use of second factor authentication

Dave Cullinane, CISO, Washington Mutual (USA); and President, Information Systems Security Association (ISSA)

INTERNATIONAL KEYNOTE PRESENTATION

10:25 **Emerging ID technologies how they will transform work, life, and everything**

- Begging the question: what is identity? how is it defined in the digital world?
- How emerging technologies transform identity - and what it will mean to you?
- Where to look to see what is emerging on the horizons?
- The shorter horizon of life and how we humans are adapting to accelerated change

Richard Thieme, Thiemeworks (USA)

11:10 Morning tea/coffee

11:30 **Avoid the mythologies of Identity Control and rediscover a sense of balance and proportion**

- The relationship between identity management and authoritarianism, and the dangers of authoritarianism to civilisation, and to business
- Nature of identities, entities, identifiers and identification
- Many myths of identity management, biometrics and terrorism
- Real world of identity management: limited technologies; need for public acceptance; risk assessment; risk management

Roger Clarke, Xamax Consultancy

12:10 **You're entitlement to a National ID Card**

- National ID case studies provide insight to deliver both security and a strategic framework for an eGovernment agenda
 - National Identity, Drivers License, Payment card...delivering complex schemes – MyKad, Malaysia
 - Importance of marketing – the UK Government approach
 - Maximising the benefits of technology – Hanis, South Africa
- First hand experience underscores lessons in defining and managing the scope of a National ID scheme and keeping ahead in procurement

Ian Povey, Director, CardsConsult (UK)

12:50 Lunch

1:40 **Towards an industry-wide authentication scheme**

- The current state of affairs
- Practical problems in implementing a national scheme
- Which technology to choose
- Other considerations

Peter Coroneos, Chief Executive, Internet Industry Association

2:20 **Best practice ID management at Australian Customs Service - Managing security, border control and preventing identity fraud**

- Smartgate - Customs trial of world-leading biometric technology for border processing
- Cargo Management Re-engineering - Identity Management with PKI
- Identity Management for corporate systems - Customs Strategy and Architecture approach
- Future challenges and opportunities

Murray Harrison, CIO, Australian Customs Service

3:00 Can authentication deal with malicious software?

- Two-factor authentication for on-line banking and internet shopping
- Strong authentication in only one part of a system
- What else is required to prevent fraud?
- Tracing the evolution of malware techniques

Paul Ducklin, Head of Technology, Asia Pacific, Sophos

3:40 Afternoon tea/coffee

4:00 CASE STUDY: Identity Management in a risk and compliance context

- How has AMP's risk and compliance agenda been progressed by our Identity Management initiative?
- What organisational considerations contribute to the shape of an Identity Management program?
- What key learnings has AMP extracted thus far?

Mark Pigot, IT Director, AMP

4:40 The Australian Government's ID Security Framework

- Evidence of identity framework
- Enrolment process - what might best practice involve
- Verification - know your customer
- Privacy and other challenges
- Role of AUSTRAC going forward

Liz Atkins, Deputy Director - Anti Money Laundering Reform, AUSTRAC

5:20 Close of Day One

5:30-7:00 Cocktail function

9:00 Opening remarks from the Chair

Guy Lupo, National Director (Australia-New Zealand), Information Systems Security Association (ISSA); and Chairman, Identity Management Network

9:10 Update on Australian passport initiative

- How does Australia compare internationally?
- Results from recent trials
- What biometrics could/will be used on the new passports?
- Plans for mass deployment
- Feedback from all parties

Bob Nash, Head of Passports, Department of Foreign Affairs & Trade

9:50 Role of biometrics in ID management and secure transactions - which biometrics are most appropriate for enterprises, passports, drivers licences, bank cards?

- Overview of the latest developments
- Which biometrics are best used to prevent fraud?
- Examples
- Evaluating the effectiveness and adaptability of the latest biometrics

Terry Hartmann, Director, Biometrics Institute; and Director & Global Security Lead, Secure Identification & Biometrics, Unisys

10:30 Morning tea/coffee

10:50 Privacy concerns revisited - what are the key privacy issues that corporate CIOs and IT practitioners need to be aware of?

- Navigating the privacy and workplace surveillance laws
- Identifying the weaknesses in identity management systems
- The mis-steps that can bring your ID management strategy to a grinding halt
- What is wrong with biometrics and identity cards?

Anna Johnston, Chair, Australian Privacy Foundation

11:30 CASE STUDY: Identity Management at Victorian Government

- Identity and Access management policy
- The directory (Rosetta)
- External Party Credentials
- Lessons Learnt

Steve Wylie, Deputy-CIO, Government of Victoria

12:10 AGIMO and the Australian Authentication Framework (AGAF) and how this impacts ID management and federated ID strategies

Robyn Fleming, Branch Manager, Investments and Enabling Projects, Australian Government Information Management Office (AGIMO), Department of Finance and Administration

12:50 Lunch

1:40 CASE STUDY: Best practice IDM at Department of Education and Training (WA)

- The business case
- A benefits-led approach
- Have a strategy
- Achievements
- Lessons
- What's next?

Justin Magraith, Project Manager, Identity & Access Management, Department of Education & Training WA

2:20 CASE STUDY: Identity Driven Networking in unique environments

- Accountability, 'Duty of Care' and governance driving use of resources in schools
- The need for combining identity management and network infrastructure domains
- The driver behind de-perimeterisation, challenges and how role based infrastructure can help

Andrew Hall, CTO, Blue Reef

3:00 Afternoon tea/coffee

3:20 CASE STUDY: Impact on management and prioritization of IDM in emergency situations

- Importance of IDM policy and process in an emergency
- Priority and security levels
- Remote access and authentication
- Available technology
- Unique challenges of the emergency services

Paul Jose, IT Manager, Emergency Services QLD

4:00 Identity & Access Management in Control

- What is Identity & Access Management (IAM) really about?
- The IAM facts of life
- What is the business case for IAM?
- How to organise your IAM program?
- Who to involve in your IAM program?
- Example approach for implementing IAM

Martijn Verbree, Senior Adviser, Security Privacy & Continuity, KPMG

4:40 Closing remarks from the Chair

4:45 Close of Conference

10 Key reasons to attend this summit

1. **Learn** about IDM trends and developments from around the world
2. **Join** the discussion about what is right and wrong with biometrics and ID cards
3. **Hear** first hand about Government's plans for a National ID Card
4. **Find** out which technology will be used to run large national ID schemes
5. **Extract** key learnings from best-practice case studies in corporate and government organisations
6. **Understand** how to deal with difficult privacy, surveillance and policy legislation
7. **Learn** more about the Rosetta project
8. **Gain** knowledge about new federated ID models
9. **Discover** how to synchronise real time information across all business units
10. **Meet** and quiz major IDM end-users, as well as key suppliers of IDM technologies and solutions ... then ascertain which solution will work best for your organization

Sponsorship and promotion opportunities

We have a number of cost-effective sponsorship and promotional opportunities available at ID Management 2006. If you have a product or service for this industry, this conference is an ideal vehicle for you to raise the profile of your organisation.

By sponsoring the ID Management 2006 you will:

- ✓ Increase brand recognition
- ✓ Create new partnership and alliances
- ✓ Develop relationships through new networking opportunities
- ✓ Demonstrate leadership in the ID Management market
- ✓ Generate qualified leads
- ✓ Access customers and prospects face-to-face

For further information on sponsorship opportunities at this event please contact Blandina McFarland on Phone (02) 9922 6431, or e-mail: blandinam@acevents.com.au

About the IDM 2006 Summit

The ID Management Summit 2006 brings together the **users** and **suppliers** of ID management solutions and technology to discuss **business** and **government** initiatives, latest trends and developments, large scale deployments, partnerships & alliances, developing standards, new applications, new business opportunities and future direction.

Senior speakers have been hand-picked to speak about **advances in ID solutions** for **government, banking, transport, education, defence, retail** and **health** with a special focus on **ID fraud/theft prevention, federated identity management, trusted computing & rights management, secure payments, identity privacy & policy, identification & authentication, biometrics** and more.

Who should attend?

Attendees to the summit include **CIOs, CSO's, CTO's**, senior **ID specialists** and **IT project managers** from some of Australia's largest organisations.

Topics of discussion will include:

- Latest ID management solutions & technology
- Physical and logical Access Control
- Authentication
- Biometrics
- Compliance requirements
- Federated ID management models
- ID cards, Drivers Licenses, e-Passports
- Secure e-commerce, on-line banking & payments
- Secure Documents
- Fraud prevention and management (especially ID theft)
- Risk Management
- Identity privacy and policy
- Trusted computing and rights management
- Business case and ROI for ID management
- Identity-based web services

About our event partner

The ID Management Summit 2006 is organized in partnership with the Identity Management Network which was established in January 2005 and is committed to:

- continuing development of a unified language to facilitate communication between all stakeholders in the identity management sector – vendors, distributors and customers
- raising awareness of identity management issues
- refining the Identity Management Map to fully describe identity management issues at the strategic level, in business processes and in technology.

The network is operated by IDM Network Pty. Ltd. www.identitymanagement.net.au

About our endorsing bodies

www.issa.org

Registered delegates are entitled to a FREE 3 MONTH TRIAL MEMBERSHIP TO ISSA

The Information Systems Security Association (ISSA)® is a not-for-profit, international organization of information security professionals and practitioners. It provides educational forums, publications and peer interaction opportunities that enhance the knowledge, skill and professional growth of its members.

With active participation from individuals and chapters all over the world, the ISSA is the largest international, not-for-profit association specifically for security professionals. Members include practitioners at all levels of the security field in a broad range of industries, such as communications, education, healthcare, manufacturing, financial and government.

Discount registration fee for ISSA, ISACA & ASIS members

www.isaca.org

ISACA got its start in 1967, when a small group of individuals with similar jobs—auditing controls in the computer systems that were becoming increasingly critical to the operations of their organizations—sat down to discuss the need for a centralized source of information and guidance in the field. In 1969, the group formalized, incorporating as the EDP Auditors Association. In 1976 the association formed an education foundation to undertake large-scale research efforts to expand the knowledge and value of the IT governance and control field.

Today, ISACA's membership—more than 47,000 strong worldwide—is characterized by its diversity. Members live and work in more than 140 countries and cover a variety of professional IT-related positions—to name just a few, IS auditor, consultant, educator, IS security professional, regulator, chief information officer and internal auditor.

www.asisonline.org

ASIS International has more than 33,000 members and is the largest international organisation for professionals responsible for security, including managers and directors of security. In addition, corporate executives and other management personnel, as well as consultants, architects, attorneys, and federal, state, and local law enforcement, are becoming involved with ASIS to better understand the constant changes in security issues and solutions.

ASIS is dedicated to increasing the effectiveness and productivity of security practices by developing educational programs and materials that address broad security concerns, such as the ASIS Annual Seminar and Exhibits, as well as specific security topics. By providing members and the security community with access to a full range of programs and services, and by publishing the only monthly magazine focused strictly on the issues and concerns of security, Security Management, ASIS leads the way for advanced and improved security performance.
